SquadApp

"Find your next teammates."

IDO BEN BASSAT

Market Need & Solution

The Problem

Discord and WhatsApp groups are flooded with noise. Gamers spend too much time searching and filtering for players who want to play specific modes or ranks.

The SquadApp Edge

A precision-driven platform for instant team matching. We focus on mode-specific rooms and cross-game social persistence to get you in the game faster.

Infrastructure & Capabilities

Core Features

Mode-based room discovery, persistent friend lists, and custom catalogs.

Backend Stack

Built on **Firebase** for scalable Authentication and high-performance Data Storage.

Server Usage

Managing secure user authentication, profile data management, and friend relationship mapping.

Application Flowchart (Game-Agnostic)

Application Walkthrough: Part 1
